Profile

Full-Stack Web Developer and Software Engineering student specializing in the MERN stack. Experienced in building modern, responsive, and scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing business websites, e-commerce platforms, booking systems, admin dashboards, REST APIs, and AI-integrated applications. Passionate about transforming ideas into clean, user-focused digital experiences with strong functionality, modern UI, and reliable performance.

Education

Bachelor's of Science — **Oct 2024 - Present**
University of management and technology (UMT), Lahore

FS.c Pre-Medical — **Apr 2022 - May 2024**
Punjab Group of College's (PGC), Lahore

Employment

Full-Stack Web Developer — **Jun 2026 - Present**
Self-employed, Lahore

* Developed full-stack web applications using React.js, Node.js, Express.js, and MongoDB. * Built responsive user interfaces, REST APIs, authentication systems, admin dashboards, CRUD functionality, and database-driven applications. * Worked on multiple real-world projects including e-commerce, booking, business, and AI-integrated web applications. * Used Git and GitHub for version control, project management, and code collaboration. * Practiced debugging, API integration, database management, deployment, and responsive UI development. * Built and maintained projects as part of a 23-month unpaid practical development internship.
